

"NATIONAL PARTIES ARE A WASTE OF TIME"

Article in The Times, April 2006

A WAKE-UP CALL FROM

PETER TICHER

YOUR RADICAL REFORM CANDIDATE

(INDEPENDENT)

THERE IS A CRISIS

Many residents are beginning to realise there is a crisis in our way of life. Our MP's can't be trusted, our banks have failed us, we are running out of water, we are polluting the air with our cars and planes, we are concreting over our land with roads and housing, but the political parties blame each other instead of tackling the issues.

SO WE MUST ACT NOW

for good government

WE NEED to elect **M.Ps for Epsom** who represent a clear majority of us – by proportional representation - our M.P. had a minority of votes on two of the last three elections

WE NEED to **run our own affairs** and take political power back from Europe. 70% of our laws are made in Brussels by the unelected European Commission

to stop global warming

WE NEED to tax aviation fuel and give an extra day's holiday to those who travel by land and sea instead of by air.

WE NEED to cut road tax to £10 and increase petrol tax to compensate, with concessions for commercial use.

WE NEED to switch off all the lights on roads outside towns between 1 a.m. and 5 a.m.

WE NEED to cut out all the duplicate traffic lights that are currently installed.

WE NEED to introduce a plastic bag tax of 10p.

Because of global warming, the future is bleak. That's why many of the things I am advocating are aimed at reducing it So, wake up and elect a person who has already put his time and money where his mouth is.

to mend our broken society

WE NEED to restore Christian values of behaviour

WE NEED to save and expand Epsom Hospital

WE NEED to stop immigration except for **genuine** asylum seekers. Britain is full, with one of the highest population densities in the world. Immigrants who break the law should be returned to their countries of origin. This would:

- Reduce pressure on housing
- Reduce unemployment
- Keep jobs for people of British origin
- Reduce expenditure on benefits
- Reduce pressure on scarce energy

WE NEED to stop the carnage on the roads by banning drivers for up to 25 years who kill or seriously injure people. This would have such a deterrent effect it could:-

- * save 1,000 lives and 100,000 serious injuries a year
- * save 20,000 bereavements a year
- * save £1 billion a year for the NHS
- * reduce hospital A & E time and ambulance and police time
- * reduce the need to build more prisons to house offending motorists
- * keep dangerous drivers off the roads and reduce traffic congestion
- * reduce insurance premiums
- * afford massive savings to spend on enforcement.

WE NEED to divide A level education into academic and practical streams, with equal status and appropriate 3rd level education in each case.

WE NEED to support families by

- **introducing Family Service Units** whereby problem families are identified and have a social worker attached to them to help them overcome difficulties before they spill over into the community.
- **make parents responsible** for their childrens' behaviour up to 16 years of age and have them attend Court with their offending children.

WE NEED to regulate the banks and stop their irresponsible behaviour. They must be made to keep a higher ratio of capital to their loans, and merchant banking should be separated from High Street banking.

WE NEED to introduce differential taxation so that caring occupations such as nursing, teaching and social services bear a lower rate of tax, and financial services such as banking, insurance and currency speculation bear a higher rate.

Abroad

WE NEED to persuade the Americans to adopt the same bipartisan approach to Palestine as we did on Northern Ireland, to persuade Israel to obey U.N.resolutions 242, 446 and 194 to end occupation of the West Bank and stop building Jewish settlements on Palestinian land.
