

Your Right To Democracy

We Stand For The System That Will Radically Change Politics

We Have No Political Agenda

Your Right to Democracy Party Ltd

The Your Right to Democracy Party believes that the people of Britain deserve the right to make their views clear and should have the power to shape legislation through a genuinely democratic process.

We stand for a new system which allows you to have a say and a vote for Policies **every** day! Not just **one** day, every **four** years.

How the System works

1. **You** put forward **your** ideas on Policies e.g. Do you want to come out of the European Union?
2. 1000 supporters for each idea are needed through the individual's personal promotion, to be able to proceed to a Government website for further support.
3. The top ten or twenty of these ideas will be put forward for voting through a secure system of voting, initially by paper. Modern technology once it's available to all, will enable this system to operate conveniently and democratically, from your own home.
4. The existing Houses of Parliament TV channel will debate fairly and openly on each of the ideas and proposals, including any financial implementations.

5. This empowers the informed public to vote and be fully involved in the decision making.
6. The elected M.Ps will implement these decisions with a majority in the House of Commons. It will be very clear to the public how each M.P. voted on each proposal.
7. This is a simple, effective system. It will result in direct input available to all political persuasions. Abuse of the current democratic system will cease in Parliament.
