

# **THE DEMOCRATIC PARTY**

The People's Party - Common Sense & In Touch

**We will never make a promise we will not honour**

- 1- No to foreign aid or immigration while in debt.**
- 2- All tax/revenue generated in England should be put back into England.**
- 3- Laws will be made/changed only by elected members and through referendums on major laws/changes to give more power to the people. House of Lords will change.**
- 4- We will cut VAT/Business rates to allow companies to create more jobs.**
- 5- Health services and tuition fees will always be free for residents in England.**
- 6- The General Election will be set every 4 years and a national holiday on voting day, all Local Elections will be 2 years after the General Election also a national holiday on voting day, St George's day will also be a national holiday.**
- 7- Local powers/elections united into 1, districts. To have full time district councillors.**
- 8- Companies will be taxed on what they earn from this country and not allowed to hide in tax havens. We will endeavour to generate more money for England that is not from taxes but from our own companies. Maybe one day there will be no taxes.**
- 9- To strive towards getting all energy from a green source and all residents to not pay for the essentials of life, water, gas and electric.**
- 10- To achieve a world at peace via building the foundations at home first. Where every child in the world has clean water, food, education, emergency services and the same chance in life.**

## **BUSINESS -**

**All companies that earn money from the English people will pay the normal tax no matter where their HQ is based in the world. We will cut VAT & Business rates to allow companies to create more jobs and charge less to the consumers. We will stop privatising our companies that make us profit.**

## **CLEANING UP POLITICS -**

**The party with the highest overall votes if not obtained the majority of seats will be handed power of Government by the people meaning there will never be a coalition again. Only elected people can make/change laws. We will action reforms instantly and cut out a lot of red tape. Referendums will rise in our pursuit to give more power to the public on major issues.**

## **CLIMATE CHANGE & ENERGY -**

**More money from not subsidising or giving money away will enable us to invest in becoming as green as possible via harnessing Energy better from the Sun, Wind and**

**Water. One day every vehicle, home and business will use energy generated from a green source.**

#### **CRIME AND POLICING -**

**More police on the beat creates a safer society. We Will increase the force and cut the paperwork. The whole country will be under CCTV for reference only and watched in built up areas like town centre's, the greatest deterrent is knowing it will be tough to get away. The punishment for most crimes will be increased.**

#### **CULTURE, MEDIA AND SPORT -**

**BBC will become self sufficient, no more TV licence, having a fairer Britain the English side of the BBC will have more money to make great programs and create more jobs. More investments in English sports will happen once our tax is used properly.**

#### **DEFENCE -**

**Our army should be solely based at home to save money to put back into making the best planes, equipment etc. Ideally we want a world where no country builds for war.**

#### **ECONOMY -**

**Having the right priorities means more money and by putting England first with all your tax, we will grow faster than any Government before us.**

#### **EQUALITY -**

**We will abolish the word racism from society as it only suggests we are different when we are all part of one race, the human race. We will not allow people to be ridiculed for being a different colour, size or having different abilities.**

#### **EUROPE -**

**Becoming independent holds no ties to Europe, no laws of ours will be made by Brussels ever and No money given either. We will continue to be part of the European market.**

#### **FAMILIES, CHILDREN AND YOUNG PEOPLE -**

**The most important job in society is being a parent, bringing up the next generation is also a priority of ours. It will be illegal for Baliffs to enter anyones home to take items because of debt, we will take a small amount from wages or benefits to pay their debt.**

#### **FORIEGN AFFAIRS -**

**Our goals after creating a stable England is to create a world at peace where every child has the same chance in life, from clean water to an education. No foreign Aid while in debt.**

#### **HEALTH -**

**A government that sells you a product that says will kill you is not a government that cares about your health, we will look to ban cigarettes and replace them with a healthier alternative, B&H electronic cigarettes for eg. The NHS will always be free to the residents of England and having the right priorities will allow us to invest much more in our health departments than ever before.**

## **IMMIGRATION -**

**Common sense says no more while we are in debt and unemployment is high. If you marry an overseas partner then you must go to their country to be with them. An exception could be debated if an overseas person comes in buying a home and spends 10 years not claiming benefits.**

## **JOBS AND WELFARE -**

**We will create a system that being in work pays better than being on benefit unlike the current system where there is no incentive to work. A system where job seekers allowance will only pay for the basics to live, food, clothes etc will encourage people to want to work but also giving the same benefits for low wage earners. No privatisation will ever happen under us, we will create rival companies in all sectors where we will only profit for research & development and more jobs. All public sector jobs concerning England will be posted in England. Companies taking your money should employ staff here and will be taxed more if they don't.**

## **JUSTICE -**

**Sentencing will be shaken up, the prison system will be simplified, as a whole in all sectors we will achieve less costs, more staff and bigger deterrents from crime. Less paperwork more officers.**

## **LOCAL GOVERNMENT -**

**We will allocate county powers to the district council and abolish the county council. Town or parish issues will be decided by councillors voted in those areas in the district elections. Only one vote for local government every 4 years will cut costs, galvanise action and give all local power to local people. This creates full time councillors dedicated to Local Government.**

## **NATIONAL SECURITY -**

**We will deport everyone who has come over here to live and ended up in jail and we will deport everyone who wants to harm our country. Again from having the right priorities we will have more money to invest in tackling crime with more staff and better technology.**

## **SCHOOLS -**

**Tuition fees will be free for English residents. More universities built, lower class room sizes. Computer programming will become a subject in senior school and will move with the times where necessary. English history the main subject in history lessons. Will debate whether to increase school time or cut school holidays to help parents work. All school meals will be free.**

## **TRANSPORT -**

**One day all transport will be electric powered from a green source.**
