

Save Hartlepool Hospital

I do not have a manifesto as my primary reason for standing in the general election is to provide the voters of Hartlepool with a simple and unambiguous chance to register their outrage about the way in which Hartlepool Hospital has been systematically run down and prepared for closure. Petitions, marches and letters to MPs have all failed, it is time to hit the politicians in the only place that matters to them, in the ballot box.

I have been asked about my position on other issues facing the town, such as the jobs and the economy. Well as a major employer in the town I think the closure of the hospital would be a significant blow to jobs and the economy of Hartlepool. I would consider other issues from the common sense point of view as a qualified health professional, wife and mother and deal with each of them on their merits.

If you think the Hospital is the most important issue facing Hartlepool today then please vote for me. If you think other issues are more important then vote for the candidate that best deals with those issues. However, please do vote for someone!

Thank you

Sandra Allison
